This opportunity is suitable for candidates looking to build an international career in the offshore industry.

KEY RESPONSIBILITIES

- Monitor and support H2S safety requirements at the worksite.
- Ensure proper use and handling of H2S monitoring equipment.
- Assist in maintaining a safe working environment for project personnel.
- Follow company safety procedures and site regulations.
- Coordinate with the safety team and other project personnel when required.
- Attend required safety briefings and training programs.
- Perform duties in accordance with project and company requirements.

ELIGIBILITY & REQUIREMENTS

- **Degree must have been completed before 2024.**
- Educational background in Engineering or Arts is accepted.
- Freshers can apply.
- Relevant experience in Oil & Gas or Offshore projects will be an added advantage.
- Candidates should be willing to work on international offshore projects.
- Candidates must be physically fit and capable of working in an offshore environment.
- Training will be provided where applicable.
- Candidates should have a strong commitment to safety and professional work practices.

CAREER OPPORTUNITIES

- Work on international offshore projects.
- Safe and professional work environment.
- Strong career growth opportunities.
- Opportunity to be part of a leading offshore company.
